STEICO *multi tape F*

High performance tape with special foil

High performance tape with special foil for internal and external use

- Solvent-free
- Can be processed from -10 °C, temperature resistant between -40° and +100°C
- High UV and ageing resistance
- High moisture resistance/ rainproof
- With split release paper for the simple formation of e.g. corner bonds

Application area

- Joint and connection bonding of STEICO wood fibre boards in combination with STEICO*multi primer*
- Joint and connection bonding in the STEICO membrane system
- Connection bonding for STEICO*fix* and STEICO*tri* sub-window sills

Technical data

Temperature resistance [°C]	-40 / +100
Processing temperature [°C]	> -10; The surface must be dry and free of ice
Minimum roof pitch [°]	10
Adhesive	Acrylic dispersion, solvent-free
Adhesive backing	UV-stabilised special film with polyester lattice, single-sided adhesion
Colour	Grey
Thickness (without release paper) [mm] (approx.)	0,3
UV resistance [months]	12
Peeling strength	fulfilled according to DIN 4108/11
Peel strength after ageing	fulfilled according to DIN 4108/11

Notes

Storage

• Store in a cool and dry place at +5 to +25 °C
• Protect from heat, cold and UV radiation

Ingredients

• Acrylic dispersion (solvent-free), special film, polyester scrim

Disposal

• dispose with normal construction waste, observe applicable legal guidelines

Cutting

• Sharp knife or other suitable cutting tool

Installation

Application in the STEICO membrane system

• Substrates must be stable, dry and free of dust and grease
• Align STEICO*multi tape F* in the middle, remove the release paper step by step, and rub the adhesive tape vigorously in the process
• Slit release paper facilitates the bonding of corners, as liners can be removed in turn as required
• The adhesive tape must be applied without creases
• If tensile forces occur, the substrate must also be mechanically fastened
• Bonds must not be in standing water. Bonding in sauna and swimming pool construction is also not permitted

Installation on STEICO wood fibre boards

• Pre-treat STEICO wood fibre boards in the bonding area with STEICO*multi primer*
• After sufficient flash-off time (if primer is transparent), apply STEICO*multi tape F*, remove release paper and rub on
• The bonding area per butt joint side must be at least 50 mm.
• To improve adhesion, additional pressing with a paint roller or roofing roller is recommended
